Rome must be considered one of the most successful imperial powers in history. In the course of centuries Rome grew from a small town on the Tiber River in central Italy into a vast empire that ultimately embraced England, all of continental Europe west of the Rhine and south of the Danube, most of Asia west of the Euphrates, northern Africa, and the islands of the Mediterranean. Unlike the Greeks, who excelled in intellectual and artistic endeavors, the Romans achieved greatness in their military, political, and socialinstitutions. Roman society, during the republic, was governed by a strong military ethos. While this helps to explain the incessant warfare, it does not account for Rome's success as an imperial power. Unlike Greek city-states, which excluded foreigners and subjected peoples from political participation, Rome from its beginning incorporated conquered peoples into its social and political system. Allies and subjects who adopted Roman ways were eventually granted Roman citizenship.
